ACTIONBOUND

Actionbound is an app for playing digital scavenger hunts by means of installed digital content in the physical world. In contrast to a geocache or a scavenger hunt **Actionbound** requires the players to create their own content.

With the Actionbound app, you can take part in exciting, fun, and informative Bounds

In this game you should scan the QR code to start the game. There are some enjoyable steps to complete it.

How to use Stages in Actionbound

- Choose wether you want the player to go linearly through the Bound or let him select the stages from a list or start them via QR code.
- Use stages to better arrange your sequence
- Give the player aid to orientation with geo tagged stages shown in the panel of the Actionbund app
